**MAIN PROGRAMMES OF STUDY**
**Bachelor in Management:** three-year program with a highly professional and intercultural vocation, the aim of which is to equip future graduates with managerial skills adapted to national and international economic requirements.

**Master in Management:** two-year program which trains expert managers, for all businesses, anywhere in the world. It is characterized by its academic rigor and coherent structure, allowing a gradual acquisition of skills with an international dimension.

**Masters of Science (MSc):** 12-month programs positioned in constantly evolving functional or sectoral areas. The objective is to train young graduates or experienced professionals by providing high-level specialized knowledge and skills enabling them to gain access to, or evolve in, high-value-added occupations, enabling them to match their ambitions with current and future business needs.

**Global Executive MBA:** delivers a world-class education for experienced managers looking to develop their international management competencies and leadership. This high-end program allows students to pick specialized tracks from the Strategic Management MBA or Aerospace MBA.

**DBA:** gives decision makers the tools to create a hypothesis and through the scientific method, analyze a problem in its entirety. Cultivating
