◆ RESEARCH

ISTEC has developed its educational content by incorporating all of its teachings from the perspective of new business models.

Research at ISTEC is coordinated and developed by CERI (Center for Studies and Research of ISTEC) and is located at the interface between the three worlds of training, research and business.

Thus, ISTEC’s research is organized around the 3 structuring research axes:

- Innovative business models: which is particularly interested in digital transformation, innovation, entrepreneurship and performance.
- The Planet axis: which focuses on issues of social responsibility, sustainable development, ethics and humanism.
- The People and Organizations axis: which is centered on the behavior of people and organizations (cooperation, agility, etc), on the management of human resources (management of diversity, development of potential, etc) and on the quality of life at work (new forms of work, redefinition of workspaces, etc.).

◆ STRENGTHS

- School in the heart of Paris
- School on a human scale
- Renowned for the employability of its graduates
- Network of graduates active and involved in the life of the school
- Company visits
- 63 international destinations / up to 3 semesters in foreign universities
- 1 double diploma with the ENIM engineering school in Metz
- A dynamic and fulfilling associative life
