EMLV is unique for its positioning and its specializations, offering a high-level, EPAS-accredited graduate degree programme conferring a Master's degree. The presence of an engineering school (ESILV) and a digital school (IIM) on campus offers students the opportunity to learn and grow through peer learning. So, in addition to the teaching and modules offered in the other two schools at De Vinci Higher Education (coding module, Fab Lab workshops, courses on climate transition, etc.), EMLV students also acquire skills complementary to those taught at prestigious management schools and learn to work with students from other disciplines. This close working relationship of the three schools at De Vinci Higher Education forms the foundation of an original educational programme that is acclaimed by EMLV’s partners, who recognise its value in preparing open-minded young professionals who are better able to work in changing, multidisciplinary and intercultural environments.

◆ MAIN PROGRAMMES OF STUDY
- Bachelor Digital & International Business. 3-year programme with Alternance & exchange opportunities
- Master in Management. 5-year programme with entry in undergraduate level or master level. Majors taught 100% in English

- 4 MSc. in English 12-month full-time programme in English with specializations in International Business, International Finance, Digital Business Analytics, Supply Chain.

◆ RESEARCH
Research at EMLV is centered around innovation and digital advancement and comprises a Business group, a Digital group and a Finance group. The Business group is made up of research professors from with backgrounds in marketing, HR, strategy and entrepreneurship. Their research focuses on innovation and technology for governance, entrepreneurship, and marketing (consumer, B2B, digital, data-driven, etc) and also on international management with a nod to corporate social responsibility, public services and NGOs, and finally on organizational change and the future of work in a globalizing business context. The Digital group brings a new way to examine integrated technological approaches. The Group participates in disruptive multidisciplinary disruptive projects, where scientists, artists, designers, professionals and students work together. The Finance group meanwhile is focused on developing quality research in economy and finance.

◆ STRENGTHS
- 1 campus, 3 schools in an outstanding campus
- 3000+ students
- 80+ nationalities represented
- #3 ranking post-bac business school in France
- 54 student associations

◆ LOCATION
In the heart of Paris-La Défense, the EMLV has an exceptional campus within the Pôle Léonard de Vinci. State-of-the-art facilities and equipment allow students to study and train in excellent conditions. The infrastructure on campus and the teams serving the students make it a unique place to live and learn.
