

TARBES

# ÉCOLE NATIONALE D'INGÉNIEURS DE TARBES (E.N.I.T.)

ENIT is a French public engineering school, accredited by the Commission des Titres d'Ingénieurs. Oriented towards Mechanical Engineering and Industrial Engineering, the school trains generalist engineers.

They are able to design, implement and operate industrial systems and production equipment with respect for the environment, standards and safety.

The multidisciplinary teaching allows students to develop skills for innovation, openness and adaptability, which are essential in an increasingly demanding industrial environment.

## ◆ MAIN PROGRAMMES OF STUDY

- Industrial Engineering
- Mechanical Engineering

## ◆ RESEARCH

ENIT's Production Engineering Laboratory (LGP) brings together more than a hundred staff: teacher-researchers, doctoral students, post-doctoral students, ATER.

It develops multidisciplinary research in the fields of Science and Systems Engineering and relies on remarkable equipment, consistent with the needs of companies and the profile of engineers trained at INP-ENIT.

4 of the 5 options offered to students between semesters 7 and 9 are backed by the laboratory's 4 research teams. The profile of engineers trained at ENIT is thus revitalized by research activities.

## ◆ STRENGTHS

- Public school of engineers in five years after baccalaureate
- Full semester
- International student mobility
- Campus on a human scale with catering and university residence on site
- Versatile general engineer training
- Professional training: 3 periods of internship in a company, apprenticeship
- 5 options from the 4th year: Mechanical Engineering, Industrial Engineering, Building

and Public Works, Engineering of Structural Materials and Processes, Design of Integrated Systems

## ◆ LOCATION

The campus offers stunning views of the Pyrenees. Tarbes, a city located in the southwest of France, is 1h15 from the Atlantic Ocean and the Spanish border. It is a city where life is good, very close to ski resorts, which you can enjoy all winter long. Please note that the cost of living in Tarbes is very affordable.

Station and airport near the school.

## IDENTITY FORM

- ◆ **Precise name of the institution**  
École Nationale d'Ingénieurs de Tarbes
- ◆ **Type of institution**  
A public school
- ◆ **City where the main campus is located**  
Tarbes
- ◆ **Number of students**  
1200
- ◆ **Percentage or number of international students**  
11,3 %
- ◆ **Type and level of qualifications awarded**  
Engineering degree
- ◆ **French language courses**  
Yes - FLE (French as a Foreign Language) courses are an integral part of the university curriculum for exchange students.
- ◆ **Programs for international students**  
Yes - Foreign students can enter ENIT in several ways:
  - Through the classical engineering program.
  - Through exchanges (semester in French or English):
    - Through a specific exchange program (ERASMUS+, FITEC or other).
    - Through a double degree agreement signed by ENIT with certain partner universities abroad.
- ◆ **Programs in English**  
Yes - European Project Semester. This original programme (EPS) for engineering students is offered by a network of 19 universities in 13 countries across Europe. For one semester, students will follow courses and carry out group work on industrial projects entirely in English.
- ◆ **Registration fees/year (for information only)**  
610 euros tuition fees
- ◆ **Postal address**  
ENIT - 47 avenue d'Azereix BP 1629 - F- 65016 TARBES Cedex FRANCE
