

CAEN

ÉCOLE SUPÉRIEURE D'INGÉNIEURS ET DE TRAVAUX DE CAEN

ESITC Caen is a school of engineering that offers a wide range of high-level programs in all aspects of building and public works. Recognition of the school's programs extends well beyond France. A degree from ESITC Caen can lead to a career in one of the large French firms that are the world leaders in the sector, but also in foreign firms of all sizes in Africa, North America, Asia, Eastern Europe, and elsewhere. ESITC Caen is vigorously increasing its international admissions by opening up its engineering, master's, and master's programs and by creating special programs to appeal to international students.

◆ MAIN PROGRAMMES OF STUDY

Programs taught in French:

- Engineering curriculum (Diplôme d'ingénieur)
- Specialized master in ecological materials and sustainable development
- Specialized master in Maritime and port engineering

- Semester and year-long study program under cooperative agreements with other institutions (see ESITC Caen Web site) Programs taught in English:

- Semester in Civil Engineering

◆ RESEARCH

ESITC Caen's research lab specializes in the following themes: materials and eco-friendly construction (development of new building materials from plant fibers and waste products), and environmental geotechnics (processing of and recovery from soils and sediments). The lab is a pilot participant in the European SETARMS program focusing on the commercial exploitation of marine sediments.

◆ STRENGTHS

Among the school's many strong points, the following stand out:

- Located in a dynamic environment, the school provides individualized support for international students

- Technical instruction is delivered by active professionals in the field of building and public works.

- A strong entrepreneurial edge and numerous partnerships with firms in the sector open doors to internships and employment opportunities.

◆ LOCATION

The capital of Normandy, Caen is known as one of France's most livable cities, with a remarkable historic heritage and many public parks and gardens. It is located just 90 minutes from Mont Saint Michel, less than 2 hours from Paris, 15 minutes from the Channel ferry terminal, and 10 minutes from the sea.

IDENTITY FORM

- ◆ **Precise name of the institution**
École Supérieure d'Ingénieurs et de Travaux de Caen
- ◆ **Type of institution**
Establishment of Private college education recognized by the State
- ◆ **City where the main campus is located**
Caen
- ◆ **Number of students**
520
- ◆ **Percentage or number of international students**
20
- ◆ **Type and level of qualifications awarded**
Ingénieur ESITC Caen, an engineering degree accredited by CTI, the French national commission on engineering degrees - Specialized masters in ecological materials and sustainable construction - in Maritime and port engineering
- ◆ **French language courses**
Yes
- ◆ **Programs for international students**
Yes
- ◆ **Programs in English**
Yes - Post Master Program : 1-year post-master) in Maritime and port engineering
- ◆ **Registration fees/year (for information only)**
Engineering program: 4400 euros (1st year), 4800 euros (2nd year), 6300 euros per year (3rd, 4th and 5th years) - Post-Master Program: 8600euros.
- ◆ **Postal address**
ESITC Caen - 1 rue Pierre et Marie Curie - Campus 2 - 14610 Caen Epron - France
