ISEP, founded in 1955, is a French engineering graduate school in digital technology, known as a ‘Grande École d’Ingénieurs’. ISEP trains very high-level graduate engineers who receive a thorough training in Electronics, Telecommunications & Networks, Software Engineering, Signal-Image Processing and Humanities, providing them with the required knowledge and competences to meet the needs of businesses. Since 2008, ISEP has been offering an international ISEP Engineering Master Degree Program which allows international students to obtain the Master Degree. Thanks to a strong partnership with the companies in related industries, this program includes a professional internship.

**MAIN PROGRAMMES OF STUDY**

3 programs have been offering to international students at ISEP:
- IEMDP program taught in English or in French Language: The ISEP Engineering Master Degree Program (IEMDP) is a 4-semester program and is open to graduates with a Bachelor’s degree in Computer Science, Electronic Engineering, Telecommunications & Networks or in the related domain.
- Post-Master (Mastère Spécialisé) programs taught in French: Post-Master in Data Privacy Management, Post-Master in Expert Cloud Computing and Saas, and Post-Master in Cyber-security and integration architecture. The three Post-Master programs comprise 352 hours of theoretical courses and 609 hours of internship in a company.
- CII (International Integrated Cycle) program is a 2-year program (Preparatory cycle). After passing 2 years' preparatory courses, the students of CII program will be enrolled in the 3-year Engineering cycle. This program is oriented to French or English speaking candidates who passed their senior high school studies in science major (e.g. A Level, Huikao, French Baccalauréat...).

**RESEARCH**
The research at ISEP is organized within a single laboratory LISITE (Laboratory of Computer Science, Signal and Image, Electronics and Telecommunication). The laboratory includes about forty researchers: 16 associate professors, 6 full professors, more than twenty PhD students and post-docs.

The LISITE Laboratory is an associate member of the EDITE doctoral school in Paris: doctoral school in Computer Science, Telecommunications and Electronics at the Sorbonne University.

Research at ISEP finds its applications in several areas:
- Health and Medical Image processing
- Connected environments: Internet of Things, sensor networks, autonomous vehicles, LiFi, 5G, etc.
- Environment and sustainable agriculture
- Education and enhancing human learning

The laboratory develops close relationships with industrial partners (CEA-LETI, Atmel, STMicroelectronics, Thales, SORIN group, FOVEA etc.) and universities (GIS-esSys, Telecom ParisTech, CNAM, etc.). Finally, the laboratory organizes and participates in the organization of national and international conferences.

**STRENGTHS**

ISEP makes a special effort to welcome international students: that effort is apparent in the increasingly international environment of the school. Close partnerships with employers allow ISEP to offer a curriculum that is appropriate to the needs and objectives of international students. Student clubs and associations of all types (technical, athletic, humanitarian) offer students an opportunity to fit into student life. ISEP’s about 9000 alumni constitute an active network of professional contacts.

**LOCATION**

ISEP has two campuses: The first campus is located in the heart of Paris (6th district, Latin area). The second campus is located at Issy-les-Moulineaux, it is considered as a smart city. Students can easily travel from the first campus to the second campus by Metro. It takes roughly 15 minutes (8 stations).

**IDENTITY FORM**

- Precise name of the institution: Institut Supérieur d’Electronique de Paris
- Type of institution: Private non-profit
- City where the main campus is located: Paris
- Number of students: 1 600
- Percentage or number of international students: 400
- Type and level of qualifications awarded: Master Degree – ISEP’s degree accredited by CGE: Post-master
- French language courses: Yes - The French Language courses take place at ILCF Paris
- Programs for international students: Yes
- Programs in English: Yes - IEMDP program is taught in English with three specializations: embedded systems, software engineering, wireless telecommunications and IoT systems.
- CII program is taught in English
- Registration fees/year (for information only): IEMDP Program: 8900 euros (2020-2021)
- Post-master Program: 12000 euros (2020-2021)
- CII Program: 7500 euros (2020-2021)
- Postal address: ISEP 28 rue Notre Dame des Champs - Paris - F-75006
