JUNIA offers three degree programs with a variety of study options. The tie that binds our programs together is a sincere focus on building a sustainable future.

JUNIA is proud to be an engineering school focused on ecological transitions, where we confront the grand challenges of today and tomorrow:
- Nourish and take care of the planet
- Accelerate energy and urban transitions
- Develop digital and industrial transition
- Reinforce health care and well-being technologies

◆ MAIN PROGRAMMES OF STUDY
HEI for General Engineering
ISA for Life Sciences and Agriculture
ISEN for Digital Science and Electronics

◆ RESEARCH
JUNIA has over 120 faculty researchers, engineers, and technicians—as well as nearly 100 doctoral candidates and post-doctorate researchers—on 17 research teams across our campuses. These teams research a range of subjects within our academic scope.

◆ STRENGTHS
1. Increase your employability with a transdisciplinary, whole-person education focused on active learning and hands-on experiences that make you immediately operational in the workforce
2. Build a customized, piecemeal training plan to fit your interests and career goals
3. Develop an international profile living and studying in a multicultural environment
4. Enjoy a rich and diverse student life in a vibrant city at the crossroads of Europe
5. Benefit from a robust global alumni network

◆ LOCATION
Lille · Bordeaux · Chateauroux
