ÉCOLE NATIONALE SUPÉRIEURE DES ARTS ET INDUSTRIES TEXTILES ENSAIT

ensait

Founded in 1889, the Ecole Nationale Supérieure des Arts et Industries Textiles trains 70 percent of France's textile engineers, who are top-level general engineers and knowledgeable about the realities of the global economy and capable of performing innovatively. At the ENSAIT, the majority of teachers are also researchers whose investigative work carries over to improve their teaching. ENSAIT students benefit from a three-part educational program that includes: a solid, diversified scientific background, exposure to human relations, focusing on languages and a concentration on the textile sector (design, production and distribution) combining new technologies in these branches. Two specializations are offered: sciences and information and communication technologies, materials and textile processes.

◆ MAIN PROGRAMMES OF STUDY

ENSAIT students benefit from a three-part educational program that includes: a solid, diversified scientific background, exposure to human relations, focusing on languages and a concentration on the textile sector (design, production and distribution) combining new technologies in these branches. Two specializations are offered: CMD (Distribution Design and Management) and TTMA (Technical Textile and Advanced Materials)

◆ RESEARCH

ENSAIT is firmly committed to innovation and welcomes its work with GEMTEX, the top university research laboratory on textiles in France that specializes in materials, chemistry, and logistics and industrial information technology. GEMTEX carries out research in three main areas:

- Human Centred Design (denoted HCD),
- Multifunctional Textiles and Processes (denoted MTP),
- Mechanics Textile Composites (denoted MTC),

◆ STRENGTHS

Numerous university residences are available for engineering students at ENSAIT. A second year engineering student is in charge of housing and the office of international services to help those needing housing and obtaining the necessary official documents for residency in France.

◆ LOCATION

The ENSAIT is located in the heart of the fourth-largest metropolitan area in France: Roubaix. ENSAIT engineering students can enjoy the nearby facilities of a Geant, a large supermarket chain, and a shopping mall complex, movies, sports facilities, university restaurant. The school is accessible by metro and train transportation five minutes away.

IDENTITY FORM

- ◆ **Precise name of the institution**
École Nationale Supérieure des Arts & Industries Textiles
- ◆ **Type of institution**
Public
- ◆ **City where the main campus is located**
Roubaix
- ◆ **Number of students**
450
- ◆ **Percentage or number of international students**
22%
- ◆ **Type and level of qualifications awarded**
Engineering degree - Master degree
Management and innovation in Fashion
- ◆ **French language courses**
Yes - Several levels of French as a foreign language
- ◆ **Programs for international students**
Yes - Ensait engineering master or double diploma (conducted in French)
- ◆ **Programs in English**
Yes - One semester entirely conducted in English
- ◆ **Registration fees/year (for information only)**
About 600
- ◆ **Postal address**
2 allée Louise et Victor Champier -
59056 Roubaix
