

UNIVERSITÉ D'EVRY VAL D'ESSONNE

ÉVRY-COURCOURONNES

With more than 12 000 students from all fields of education, Université d'Evry is a member of Université Paris-Saclay, responsible for 15% of all research in France.

Université d'Evry pursues a double objective. Firstly, a territorial goal of international scope: to provide quality higher education in close proximity to an expanding young population. Secondly, a societal goal: to promote youth individual growth aiming at producing citizens and graduates ready to integrate into society and into the world of work in accordance with French republican principles.

Université d'Evry distinguishes itself through cutting-edge research in hard sciences, such as Genomics and postgenomics, applied mathematics, informatics, information and Communication Sciences and Technologies (ICSTs), as well as robotics, autonomous vehicles (flying and earth-bound), and space science and technology. This is achieved through close partnerships with Biocluster Genopole, the Cluster Paris-Drones, and through Université d'Evry's frontrunner role in the framework of the French government program Careers and Qualifications Campus – Aeronautics and Space, currently under development.

Human and Social Sciences researchers (in economics, law, sociology, and history) examine economic balances, compare public and private law, question the place of man in the world of work, analyze the relations between man and visual media, arts and music, with a primary focus on societal challenges.

Finally, Université d'Evry's campus life is vibrant and multicultural. Seminars, exhibitions, arts and cultural activities, sports: everything is in place to foster a vibrant campus life in the heart of the city of Evry (60% of the bachelor students

are locals). Strong links with local actors make the Université d'Evry a privileged partner in numerous solidarity and innovative projects aspiring to create the society and the world of tomorrow.

◆ MAIN PROGRAMMES OF STUDY

Fundamental Applied Sciences: Science and Technology: Law and Political Science: Social Sciences and Humanities: Foreign Languages, Arts and Music.

◆ RESEARCH

The UEVE includes 18 recognized laboratories (including 8 mixed with the major French research organizations). The research training is provided by seven doctoral schools coordinated by the University Paris Saclay.

The University of Evry develops its scientific policy around 4 areas:

- Genomic and post-genomic sciences and its applications to health and the environment
- Science and engineering:
- Finance
- Labour, business, employment and public policies

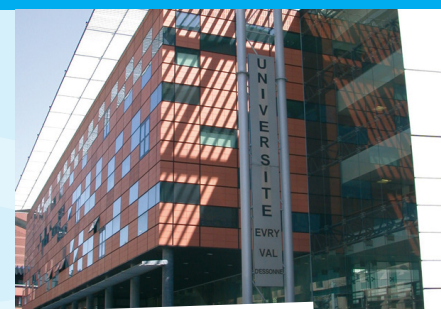

◆ STRENGTHS

Our programs are backed by cutting-edge research, a multidisciplinary approach and innovative learning methods.

The university environment, actively benefiting from its local partners (Biocluster Genopole, local hospital Centre Hospitalier Sud Francilien, charity AFM-Téléthon, different companies, etc), offers students and young researchers the best conditions for the acquisition of knowledge and higher-level skills.

◆ LOCATION

Located 30 km south of Paris centre, just 30 min from the Gare de Lyon.

IDENTITY FORM

- ◆ **Precise name of the institution**
Université d'Evry-Val-d'Essonne
- ◆ **Type of institution**
Higher Education and Research public institution.
- ◆ **City where the main campus is located**
Évry-Courcouronnes
- ◆ **Number of students**
12 000
- ◆ **Percentage or number of international students**
15%
- ◆ **Type and level of qualifications awarded**
Licence, Master, Doctorat - Other national degrees: Professional Licences
- University degrees: DAEU, DU - Other degrees: MST, DEUST, DRT, HDR
- ◆ **French language courses**
No
- ◆ **Programs for international students**
No
- ◆ **Programs in English**
Yes - 4 Masters: Master System & Synthetic Biology - Master Tissue, Cell and Gene Biotherapies - Master Financial Engineering - Master Smart Aerospace and Autonomous Systems
- ◆ **Registration fees/year (for information only)**
Licence: 170 euros: Master 243 euros : Doctorat: 380 euros (Registrations fees for 2018/2019)
- ◆ **Postal address**
Boulevard François Mitterrand - 91025 Évry Cedex
