Université Paris-Sud, founded in 1970, is a multidisciplinary institution offering more than 200 nationally-recognised degrees in the following areas: Science (Mathematics, Information Technology, Physics, Chemistry, Biology, Earth Sciences and others), Pharmacy, Medicine, Engineering, Law, Economics, Management, Sports, Technology. 27,300 students on 5 sites south of Paris, the largest being Orsay campus, located in the midst of a botanical garden of 250 hectares. With more than 270 hectares, Université Paris-Sud is the largest university campus in France. Université Paris-Sud comprises 5 faculties, three IUTs (institutes of technology delivering technical degrees) and one School of Engineering (PolytechParis-Sud).

◆ MAIN PROGRAMMES OF STUDY
Science (Mathematics, Information Technology, Physics, Chemistry, Biology, Earth Sciences and others), Pharmacy, Medicine, Engineering, Law, Economics, Management, Sports, Technologities. Details on programs available online at www.u-psud.fr/fr/les_formations.html. Details on programs taught in English available at www.u-psud.fr/formationsinternationales.

◆ RESEARCH
The university houses 70 high-level research laboratories, most internationally renowned. Many are affiliated with the CNRS (National Center for Scientific Research), INRA (National Institute for Agricultural Research), INSERM (National Institute for Health and Medical Research), INRIA (National Institute for Research in Computer Science and Control) and the CEA (Atomic Energy Commission).

◆ STRENGTHS
Students on the campus benefit from many services providing the teaching tools and technological resources necessary for successful studies, including libraries, state-of-the-art computer labs and language labs, high-quality cultural activities and sports activities. We help international students to find accommodation and complete administrative registration (residence permits, etc). The university has signed numerous bilateral agreements with higher education institutions in nearly 80 countries, including every country in the enlarged European Union, Russia, North America, Australia, and many countries in Latin America, the Mediterranean region, Asia, and Sub-Saharan Africa. It supports exchange programmes for students and faculty as well as curricula with double degrees or joint diplomas.
