Founded in 1229, Université de Toulouse is one of Europe’s oldest universities. It took the name of Paul Sabatier, winner of the 1912 Nobel prize in chemistry, when it assumed its modern form in 1969. Today, Université Paul Sabatier Toulouse III (UPS) offers a diverse array of programs in the sciences, health, technology, athletics, and engineering throughout the Midi-Pyrénées region.

◆ MAIN PROGRAMMES OF STUDY
- 5 broad fields of study: sciences, health, technology, athletics, engineering.
- 18 Licence programs
- 55 Licence Pro (professional licence) programs
- 23 master’s programs
- 105 possible concentrations in 2-year master’s programs
- 20 different 2-year technology degrees

◆ RESEARCH
One of France’s preeminent research institutions, UPS is engaged in publicly funded advanced research performed primarily within clusters of excellence and in partnership with major scientific organizations. Recognized in Europe and throughout the world, UPS research laboratories stay on the cutting edge of science by balancing the fundamental disciplines with cross-cutting aspects of science, pooling efforts to increase knowledge through basic research and to promote its dissemination.

◆ STRENGTHS
A standard-setting public university A university true to its missions A university open to the world A multicampus university serving an entire region A place of exchange, debate, and discovery

◆ LOCATION
The UPS campus lies southeast of the city of Toulouse. It is served by bus and metro (line B, Université Paul Sabatier stop). The campus can also be reached by a bicycle trail running along the Midi canal.
